Description

Rhoé develops hardware and software solutions that help cities augment their processes, by offering end-to-end automation. The team at Rhoé firmly believes that every city should be effective, innovative and friendly. We are always striving to create products that are every city's ticket to the 21st century. No matter its size or budget.

Areas of Activities

Applications

1. Transport and Logistics
2. Smart cities and Mobility

Idea

R&D partnership

Rhoe is poised to take part in a plethora of EU funded projects in the coming years. As a company we would excited to cooperate on co-authoring research proposals with business and institutional partners that have strong research capabilities.

Keywords: R&D EU

Cooperation Offered

1. Technical co-operation

Cooperation Requested

1. Technical co-operation

Offer & Request

Cooperation opportunities for Balkan area

The smart city solutions that Rhoe offers are easily adaptable to emerging and established markets. We are looking for partners in Balkan countries that will promote our products in their respective markets. In return, Rhoe can act as a entryway to the greek market.

Keywords: smart cities cross-selling
