Description

The Bulgarian company Alex-EK has been on the electrical supplies market for over 20 years. Mainly supplying the industry with LV ABC (low voltage aerial bundled conductor) accessories and electrical panels has branched out to smart home installations support and development. In the last few years, the branch of smart appliances has been growing and the company is constantly looking for new products to add to their portfolio. Many installations have already been done and the company is offering in-house technical support staff. The company is now looking for suppliers of wireless appliances and devices (operating on the Z-wave transmission standard) along with controllers and software. There is a huge interest by the company in personal health measuring devices and appliances like smart scales and smart mirrors.
